

EQUINE GENOTYPING

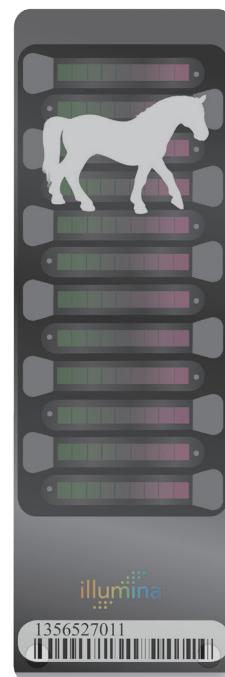

Equine SNP70 Beadchip Whole Genome SNP Profiling Available Exclusively from GeneSeek

The Equine SNP genotyping BeadChip is built on Illumina's Infinium platform and is the most comprehensive solution available for genome-wide genotyping. This improved, second generation BeadChip features more than 65, 000 evenly distributed SNPs derived from the EquCab2.0 SNP collection.

The Equine BeadChip offers a powerful tool to enable identification of genes and polymorphisms that contribute to traits of interest in all major horse breeds.

Custom SNP Genotyping Panels also Available

- For more flexibility on SNP content and SNP numbers, custom solutions are available
- Using a range of platforms (Sequenom, Illumina and Affymetrix) we can design, build and genotype bespoke SNP panels for projects requiring anywhere between 1 SNP - 1 million SNPs
- Parentage Testing
- SyncroGait™ gene test also available
